MICROSENSE

SOFT PERFORMANCE

- **SOFT TOUCH**
- **SILKY LOOKING**
- **SUPERIOR COMFORT**
- **EASY CARE**

T E C H N O L O G Y

MICROSENSE technology combines **softness to performance** thanks to the use of micro and/or multi-flament yarns and special softeners.

These fibers are made up of fine lightweight strands which mimic the features of superior fibers such as silk.

It also boasts an **excellent moisture wicking ability**, contributing to a natural humidity balance, taking comfort to the next level.

MICROSENSE provides the right properties for the creation of textiles which are easy to use, do not require ironing and dry more rapidly than the majority of natural fibers.

Fabrics applying MICROSENSE technology are ideal for **lightweight garments** that come into direct contact with the skin.

MICROSENSE TECHNOLOGY CAN BE APPLIED TO THE FABRICS OF OUR PRODUCTS:

BLIZZARD
THERMAL COMFORT

COSMOPOLITAN
FASHION-TECH

THUNDERBIKE
POWER
STRETCH & SHIELD

SPORTAGE
WHITE OPACITY
