

## **Sitip at Techtexsil will be guest of Performance Textiles in Fashion special show**

*Chosen among the companies able to transform their fabrics into extraordinary performances fashion garments, Sitip will bring to the fair its COSMOPOLITAN Fashion-tech line*

As Techtexsil is planning a strong re-start this year, among the activities related to the fair, it has organized the Performance Textiles in Fashion special show, with the aim to demonstrate the properties or possible applications some companies can develop as end products. The special show will take place in hall 9.1 bringing functional textiles to fashion with extraordinary and innovative garments.

Sitip has been chosen as a participant of this Techtexsil Special Show and will present one of its best and highly appreciated development "from fabric to clothing": the warp-knitted white shirt in COSMOPOLITAN Milano, a 4-way stretch fabric very quick to dry, giving exceptional comfort on the skin, freedom of movement and perfect fit; the jacket and pants made with our special COSMOPOLITAN Citylife, which is a 4-way stretch nylon fabric equipped with UPF 50+ protection, quick drying, easy care, highly performing, breathable, comfortable, insulating and with an exceptional fit.

These two fabrics are part of the COSMOPOLITAN Fashion-tech fabric collection, modern and practical, here dedicated to man and to the contemporary urbanwear style that perfectly meets the new performance and design needs required by the market and the final consumer.
