

## **SUSTAINABLE EXCELLENCE: SITIP IN THE SPOTLIGHT AT PERFORMANCE DAYS IN MUNICH**

Cene, March 2024 - **Sitip S.p.A** confirms its participation at **Performance Days** fair in Munich, which will take place on 20 and 21 March.

**Sitip**, a leading company in the textile sector, will be presenting its latest collection of innovative and high-performance fabrics, confirming its commitment to excellence and sustainability: the fabrics that will be presented at Performance Days boast extraordinary breathability, wearability, elasticity and resistance, while also paying special attention to environmental protection and the health and safety of the end consumer, cornerstones of the company's philosophy.

Indeed, as part of its commitment to sustainable development, Sitip operates with certifications such as Bluesign®, Oeko-Tex®, GRS, and ISO 50001, and adheres to the ZDHC gateway. It also adopts the ISO 14001 system to ensure the control and monitoring of environmental aspects, as well as the SA8000 certification, a globally recognised benchmark standard created with the aim of ensuring optimal working conditions. Sitip also aims to obtain ISO 14064 certification, which will allow the company to measure its GHG emissions in order to implement Carbon Management policies. To demonstrate the Bergamo-based company's commitment to the planet, in 2022 Sitip presented its Sustainability Report for the second year running. The publication of the third budget, for 2023, is planned soon.

Exemplary in its concern for the environment and consumer health, **Native Sustainable Textiles**, which uses recycled yarns and low-impact chemicals, thereby reducing the consumption of natural resources, will be showcased at Performance Days.

This line, a revolution in the production of technical textiles with sustainability-oriented qualities, holds all major internationally recognised certifications.

Part of the line, the **Native Trophy** fabric, designed for everyday wear, offers breathability and comfort, suitable for making shirts, T-shirts, and tops.

**Native Thunderbike Power**, designed for high-performance sport, is a product that guarantees excellent elastic modulus and fit over time. **Eclipse Sun Protection** technology, which combines high mesh density and yarn opacity, ensures maximum coverage and UV protection (UPF 50+).

**Native Sidney Cosmopolitan** is a post-consumer recycled circular fabric, originally designed for technical and sporty use and now redesigned for city life. This fabric combines casual style with advanced technology.

Finally, the **Native Portofino** fabric stands out for its breathability, lightness and softness, offering maximum comfort in contact with the skin.

The range is completed by **Thunderbike Power** and **Cobra 40 Power** fabrics, designed to offer unrivalled performance in sport, but versatile enough to be used for casual, urban wear.

It will be possible to touch **Citylife Cosmopolitan**, a techno-sartorial fabric designed for lifestyle garments such as outerwear, trousers and jackets, featuring an interesting and structured colour chart and **Florence Cosmopolitan**, perfect for dresses, polo shirts and T-shirts thanks to its extraordinary breathability.

*“Sitip’s participation at Performance Days fair in Munich is a significant moment to share our latest textile creations with a passionate and excellence-oriented community in the industry. We are excited to present our cutting-edge fabrics that combine high performance and sustainability.”*

*“The journey towards sustainability is at the heart of our corporate philosophy. Every fabric we present at the fair is the result of our efforts to reduce our environmental impact, using recycled yarns and low-impact chemicals. Our **Native Sustainable Textiles** line is a tangible demonstration of how we are redefining the future of textile production from an ecological standpoint,”* commented Silvana Pezzoli, Vice President and Commercial Director of SITIP S.p.A. and President of the Made in Italy Cluster.

Sitip’s participation at Performance Days is an opportunity to share its experience and latest innovations in the textile industry.

We warmly invite you to visit our stand, Hall C1 - **BOOTH E16-E17**, and discover how Sitip is redefining the standards of sustainability and innovation in the textile world.

#### **About Sitip**

Founded in 1959 by Luigi Pezzoli in the heart of the Seriana Valley and currently run by the family’s second generation, Sitip is a leading manufacturer of run-proof, synthetic and stretch fabrics, as well as circular fabrics for technical and industrial applications, sportswear and urbanwear. Research and development are an important part of the company’s operations, carried out in close cooperation with customers and partners, allowing Sitip to be a leading player in the textile market. Its commitment to reducing its environmental impact and constant focus on ethics led the company to publish its second Sustainability Report in 2022, accompanied by various certifications, including UNI EN ISO 9001, ISO 14001, ISO 50001, Bluesign®, Oeko-Tex® and GRS. SA8000 and ZDHC Roadmap to Zero. Sitip S.p.A. exports worldwide from production sites in Cene in the province of Bergamo, in Asolo in the province of Treviso through its subsidiary Accoppiatura Di Asolo, and in Malta through its subsidiary Nylon Knitting Ltd.
